COVID-19 Vaccine

Currently, we are following State and Federal government guidelines for administration of COVID vaccine. There is a limited supply of vaccine currently available and careful management is occurring to make efficient use of the vaccine. As additional vaccine is received in Greenlee County, wider distribution to other high risk and essential occupations will occur in accordance with State and Federal government guidelines. Public notification will occur via Greenlee County Health Department Facebook page, regional newspapers and radio stations, and other community communication outlets when the additional doses are available to the public.
