## Community Areas

In Greenlee County, we are currently planning and preparing for a possible Coronavirus outbreak. As a Community Area you have a responsibility to protect the public and will be required to take additional steps to protect against Coronavirus. The following procedures should be implemented immediately:

1. Create a plan to enhance your current disinfection procedures of your high traffic areas. These areas will include, door handles, hallways, lockers, (non-food use) tables, chairs, register areas, bathroom doors, sink handles, toilet handles, walls, and any other hard surfaces that can be disinfected. Tables, chairs, and register areas can be sanitized easily after each use, however, consider disinfection in other areas at least 2 times per day. Most commercial sanitizers are effective if used per manufacturer specifications. However, if you run out or need to use bleach, please use a 1% bleach solution. **To make your own 1% bleach solution dilute 1/3 cup 5.25-6.15% sodium hypochlorite (bleach) into one gallon of water.**
2. Disinfectant wipes can also be effective. Please adhere to directions on the label for proper sanitation.
3. For a complete list of CDC and EPA approved disinfectants please visit <https://www.americanchemistry.com/Novel-Coronavirus-Fighting-Products-List.pdf>
4. Social distancing is the best defense against the spread of this virus at this time. Please keep that in mind as you are scheduling events and social gatherings. We are not recommending cancelation of public events currently, but if you have the capacity to postpone or do events virtually please explore the possibility of these options for the future.

Together we can help minimize the likelihood of a community outbreak and you will be a vital part of that plan. If you have any questions or need guidance please contact Haiden LaFoy at (480) 747-0080.
